PROJECTS

Little Library — *Personal Library Inventory Management React App*

Developed a scalable and responsive React-based book inventory app integrated with Firebase. Implemented secure authentication, efficient state management, and full CRUD functionality. Ensured maintainability through structured component architecture and reusable code.

Dog Days — *Product Landing Page*

Designed and developed a responsive landing page using semantic HTML5, CSS3, Flexbox, and Grid. Implemented WCAG-compliant accessibility features and optimized navigation across devices. Ensured cross-browser compatibility, efficient form validation, and maintainable CSS architecture through modular design and progressive enhancement strategies.

The Kitchen — *Restaurant Website*

Built a functional and elegant restaurant website leveraging semantic HTML5 and CSS3. Implemented modular CSS architecture for scalability and maintainability, optimized navigation with Flexbox/Grid layouts, and enhanced usability with media queries for responsiveness across devices.

EXPERIENCE

Cairns & Canu — *Systems & Operations Manager*

SEPTEMBER 2021 - SEPTEMBER 2023 | REMOTE

Improved the quality and efficiency of the support team by focusing on optimization, utilization, and development of internal processes. Contributed to the success of community growth and development by maximizing brand capabilities through education, effective problem-solving, and thoughtful solutions.

Raeside & Company — *Digital Operations Coordinator*

JANUARY 2016 - SEPTEMBER 2021 | SAN DIEGO, CA

Designed and developed low code websites in Kajabi, Squarespace, and Shopify. Drafted copywriting and design materials for digital products using Adobe InDesign. Projects include Luxury Hairstylist, Lorean Cairns, The Shoppe by Witty, The Mill Fallbrook, and Solemn Oath Tattoo.

SKILLS

Adaptability
